

CIFA Introduces the New Steeltech 20-Meter Truck-Mounted Pump Range

At Bauma 2025, CIFA unveils its new range of 20-meter concrete pumps: ease of use, enhanced comfort, and simplified maintenance. Visit CIFA Stand FS 1105/4.

Milan, Italy – March 24, 2025 | CIFA, a global leader in the production of concrete machinery, proudly announces the launch of its new Steeltech **range of 20-meter truck-mounted pumps: K20L, K24L, and K28L**. These models combine performance, modularity, and ease of use, designed to meet the diverse needs of operators and clients in residential, commercial, and infrastructure sectors.

Why Choose the Steeltech 20m Range?

The new **20, 24, and 28-meter models** offer innovative solutions that bring tangible benefits to both site operators and clients who choose to invest in them.

1. Benefits for Operators

- **Ease of Use:** Intuitive controls and advanced systems, including a **7" LCD display**, reduce training time, enabling even less experienced operators to work confidently and efficiently.
- **Enhanced Comfort:** The **V-Stop vibration reduction system**, applied to the pumping unit, minimizes operator fatigue (less stress from noise and vibrations) and reduces component wear.
- **Simplified Maintenance:** Optimized operation and reduced wear lower the need for extraordinary maintenance. The **Smartronic management system** quickly identifies issues, while the **CIFA VISTA** remote monitoring system helps plan preventive maintenance, minimizing downtime.
- **Convenience:** The lightweight structure allows for the transport of additional accessories, such as pump line pipes, without exceeding weight limits.

2. Benefits for Clients

- **Operational Efficiency:** The new pumping units and **V-Stop** ensure precise and consistent concrete delivery, optimizing work time and boosting productivity.
- **Adaptability to Site Needs:** Chassis compatibility with 2- or 3-axle trucks allows for machine configuration tailored to specific project requirements, offering maximum flexibility.
- **Reduced Operating Costs:** The lightweight design reduces transport costs, while the modular structure shares components with other models, optimizing spare part purchases.
- **Reliability and Safety:** Advanced stabilization and electronic control systems ensure safe and reliable performance even in challenging conditions, reducing risks and unexpected incidents.

The Range

- **K20L: Compact Design** - Featuring a 20-meter boom, the K20L is the ideal solution for sites with limited space, such as historic centers or residential areas, as well as for more complex projects. Despite its compact size, it delivers high pumping performance with precision and efficiency.
- **K24L: Versatility** - With a 24-meter boom and compatibility with 2- or 3-axle trucks, the K24L strikes the perfect balance between flexibility and performance. It is ideal for sites requiring frequent operational adjustments, such as multi-story buildings or extended distribution lines.
- **K28L: Power and Strength** - Equipped with a 28-meter boom and designed for 3-axle trucks, the K28L is built to handle large workloads in both infrastructure and residential contexts. Its robust structure ensures consistent reliability even under the most demanding conditions.

CIFA invites you to discover the 20-meter range at Stand FS 1105/4 in the outdoor exhibition area at Bauma 2025.

About CIFA

CIFA is a leading manufacturer of concrete machinery and equipment, a market leader in Italy and a key global player. Part of the Chinese industrial group Zoomlion since 2008, CIFA is a highly international company with sales and support networks on every continent. It offers clients not only a reliable and high-quality product range but also financial support through Zoomlion Capital Financial Services. For more information, visit www.cifa.com.
